# The Skylight Alternative

LIGHTING THE WAY WITH  
SOLAR TECHNOLOGY

[www.illumeskylights.com.au](http://www.illumeskylights.com.au)

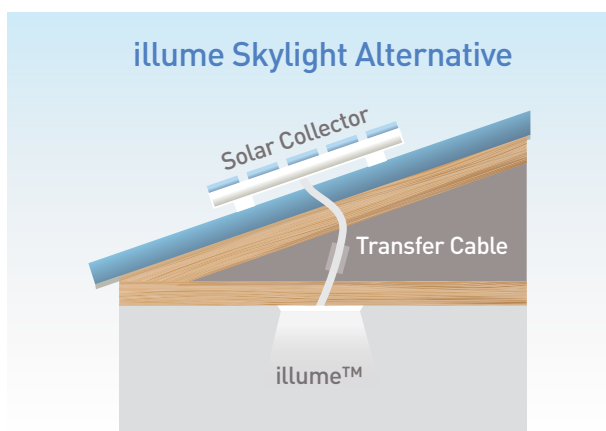

The illume™ Skylight Alternative has a sleek design with inbuilt technology that will transform any room into a bright space by emulating the lighting conditions outside.

You can install an illume to replace a traditional skylights or to add extra light to your home, where traditional skylights can't be fitted. illume operates with no running costs or batteries.

Unlike traditional skylights, there is no light tunnel, and no roof access required to install an illume.

## Reasons To Choose illume

- Requires no mains power or batteries
- No running costs
- Easy to install
- No light shaft
- Suits multi-level dwellings
- No insects collecting in the light diffuser
- Fully sealed - no leaks or heat transfer
- Hail resistant
- 2 year warranty upon registration

illume can be installed in any room including walk-in robes, enclosed hallways, kitchen pantries and even in your bathroom- the possibilities are endless!. And, unlike a conventional skylight you can use illume™ to brighten basements and attics.

### How Does It Work?

illume works by collecting energy from the sun via the solar panel. The energy collected is then converted into electrical current which powers the illume panel. No batteries required!

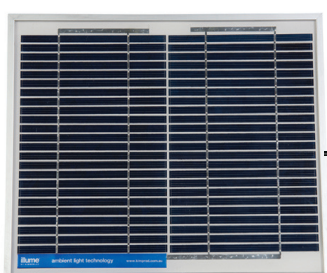

illume automatically comes to life at sunrise, and it's intensity varies during the day depending on sun exposure and cloud cover.

### Ambient Light Technology

illume Ambient Light Technology (A.L.T) brings the ambience of light into the dark areas of your home, creating the feeling of harmony between external and internal lighting conditions.

### Peace of Mind

Manufactured and backed by an Australian company established in 1955, rest assured we will be here to help if required.

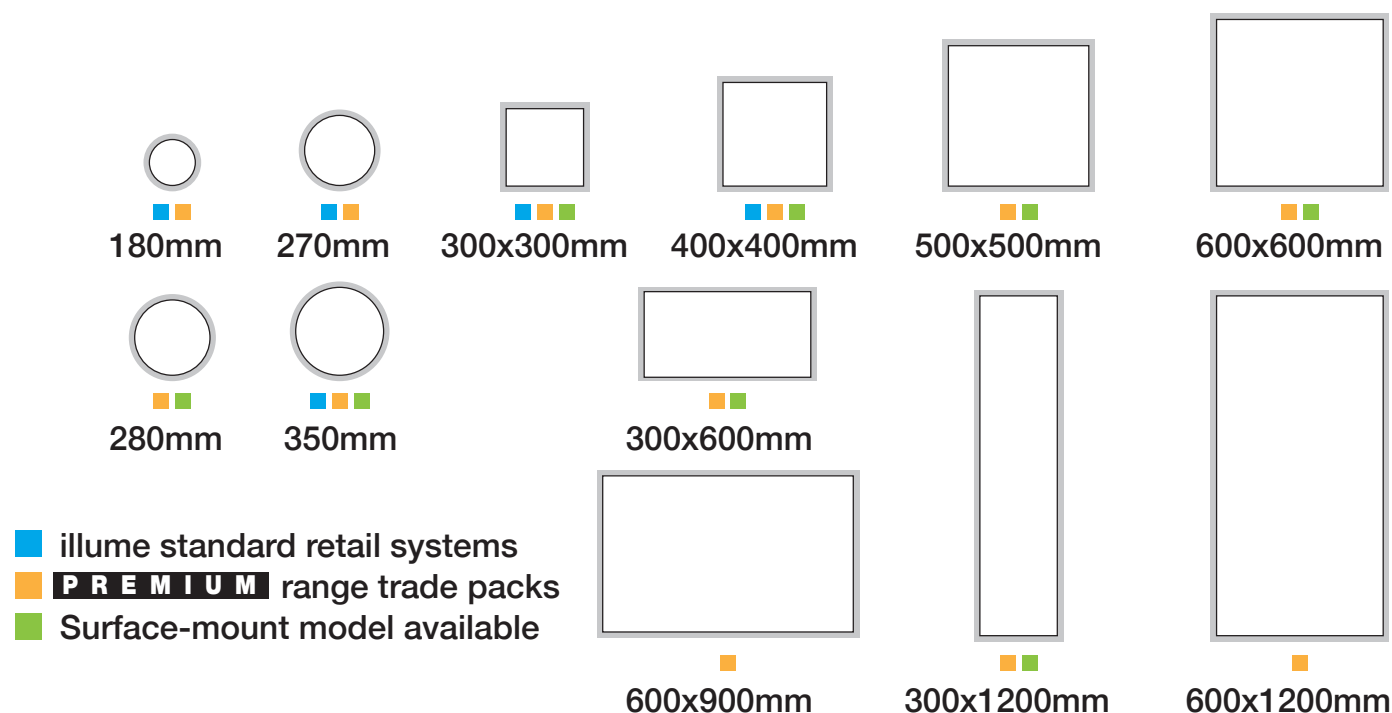

Transfer Cable  
& Control Module

## So Many Options

We have a range of illume models and sizes to suit every location in your home. Choosing an illume to fit your space is simply a matter of choosing the size and the light output that suits.

## SPECIFICATIONS
